

EASYGATE SPT - OUTDOOR

RUGGED. SECURE. EFFICIENT.

ABOUT EASYGATE SPT – OUTDOOR

The Centurion EasyGate SPT - Outdoor is our state-of-the-art swing barrier speedgate, upgraded to withstand the elements. The EasyGate is the perfect solution for all outdoor environments, using durable glass barriers combined with optical tailgate detection technology to provide a high throughput / high security gate.

The swing barrier design ensures the same narrow pedestal can be used for both standard width and DDA lanes. The motorised, hands free barrier operation provides for a 'no contact' entry solution designed for outdoor use which provides a high level of security and ease of use.

KEY FEATURES

- Meets IP53 requirements
- Swing barrier operation
- Barrier height up to 1800mm
- DDA compliant
- Durable design

OPERATION

The barriers work in a normally closed mode and quickly swing down the pedestal length after a valid card has been presented giving the authorised user a clear lane to pass through. The barriers quickly close behind the authorised person, thereby deterring any unauthorised entry or tailgating. The EasyGate SPT features our state-of-the-art Magnet Drive Motor that provides faster and quieter operation. The glass barrier for the EasyGate SPT can be up to 1800mm tall to prevent climb over attempts and making it suitable for unmanned applications.

SAFETY

Safety is at a premium with multiple safety sensors designed to stop the barriers from closing if a user is in the lane. The speedgates can also be linked with your fire alarm system to automatically open in an emergency. The speedgate can also be easily integrated into your building's existing access control system and its alarm outputs can be used to drive CCTV, lock doors, control elevators or activate other 3rd party security devices in the event of a security breach.

ADD ON'S

Build a seamless, secure experience with an automatic card return system, built-in elevator destination display, and colour-coded lights that alert the user when they can safely pass through the gate.

KEY BENEFITS

- **Durable design**
 - The speedgate is designed to suit all outdoor environments
- **Fast acting barriers**
 - Patented MDD system is our fastest yet
- **High-end aesthetics**
 - European architectural design
 - Durable, stainless steel pedestal
 - Same slim pedestal design for wheelchair lanes
- **Reliability**
 - MTBF of 5,000,000 operations
 - 36 month warranty
 - Manufactured in Europe to ISO9001
- **Heightened security**
 - Fast acting barriers close behind authorised users to deter tailgating
 - IR sensors detect tailgating and unauthorised entry
- **User friendly**
 - No contact barriers provide easy passage, even with luggage
 - Fast-acting barriers open away from users
- **Versatility**
 - Designed for use in fast throughput environments including office lobby's and public transportation.

ABOUT ENTRANCE CONTROL

Entrance Control is the exclusive distributor for some of the world's most prestigious entrance control brands that are used to protect leading corporations, governments, leisure and education facilities as well as retailers around the globe. The products highlighted here are just some of the options available that make up the Entrance Control portfolio of entrance control solutions.

With over 14 years' experience Entrance Control is the ideal choice of partner for all your entrance control requirements. Entrance Control offers supply only to full turnkey installation projects and has a variety of flexible support and maintenance options to ensure the ongoing reliable operation of your entrance control solution all backed by a Sydney based 24/7 telephone support helpline.
