

Entrance Control

SensorWall

ABOUT

Sensor Wall removes the need for a pedestal, allowing you to add a single-gate lane into a limited space. The sensing technology embedded into the wall is identical to that provided by a pedestal, maintaining the same level of security without compromise.

Our innovative solution is the ideal way to add a single-gate lane into a space that would otherwise only be able to accommodate one double-gate lane, or where it would be handy to be able to include another lane of throughput.

Any EasyGate in our range is compatible with Sensor Wall, we can work with you and your space requirements.

KEY FEATURES

- Space Saving Design
- Flush Mounting
- Makes More Lanes Fit in Tight Spaces
